目次 INDEX

01	Financial Summary	P.03
02	Medium-Term Management Plan (2026 to 2028)	P.08
03	Company Profile	P.20
04	Appendix	P.48

Summary of Financial Results for FY2026 2nd Quarter

01

Financial Results for FY 2026 2nd Quarter

- Achieved year-on-year growth in revenue and profit at all levels, delivering record-high first-half results.
- Strong wafer-related business drove performance, enabling RST to achieve its first-half targets for both revenue and operating profit.

(Million JPY)	FY2025 2 nd Quarter	FY2026 2 nd Quarter	Year-on- Year	Difference
Net Sales	37,999	40,595	6.8%	2,596
Cost of Sales	26,379	27,844	5.6%	1,465
Gross Profit	11,620	12,750	9.7%	1,130
SGA	4,516	5,015	11.0%	499
Operating Income	7,103	7,735	8.9%	632
Non-operating Income	1,502	1,933	① 28.7%	431
Non-operating Expense	1,448	652	② -55.0%	-796
Ordinary Income	7,157	9,016	26.0%	1,859
Net income attributable to owners of parent	3,800	4,149	9.2%	349
Net Income per share (yen)	143.79	156.16	8.6%	12.37

Supplementary Comment

①

Subsidy income (GRITEK)
JPY 704 million → JPY 737 million

Foreign exchange gain
JPY 0 → JPY 421 million

②

Foreign exchange loss
JPY 822 million → JPY 0

Equity in investment loss
(SGRS, 12 inch prime wafer business in China)
JPY 505 million → JPY 416 million

Profits and losses will be incorporated into our consolidated financial results in proportion to our ownership stake.

12-inch wafer sales volume increased due to steady progress in customer qualifications, while higher prime wafer sales improved ASPs and reduced losses.

Financial Results for FY2026 2nd Quarter Segment Trends

Wafer Reclaim Business

- Higher production volumes from capacity expansion drove sales and profit growth.
- The sales wafer mix improved, while higher costs kept the operating margin flat YoY.

(Sanbongi Plant maintenance costs increased by JPY 239 million YoY.) (Personnel expenses increased on human capital investment.)

Prime Wafer Business

- 8-inch prime wafer shipment volumes increased following capacity expansion.
- Silicon parts for etch equipment achieved sales and profit growth, supported by strong demand and new customer acquisitions.

Semiconductor-related Equipment& Materials Business

- RSPDH posted lower sales and profit due to planned production cuts.
- Energy business revenue increased and operating losses narrowed, driven by VRFB electrolyte sales and consulting income.
- Trading business and DG Technologies remained soft overall.

(million JPY)	Wafer Reclaim Business		Prime Wafer Business		Semiconductor-related Equipment & Materials Business		Other adjustments		Consolidated total	
		YoY		YoY		YoY		YoY		YoY
Sales	14,284	+6.8%	13,902	+39.0%	13,642	△12.1%	△1,234	—	40,595	+6.8%
Operating Income	5,069	+6.9%	3,240	+39.1%	413	△54.6%	△987	—	7,735	+8.9%
Operating Margin	35.5%	+0pt	23.3%	+0pt	3.0%	△2.9pt	—	—	19.1%	+0.4pt

Quarterly Results Chart for FY 2026 2nd Quarter by Segment

- Wafer Reclaim Business:** Revenue growth was driven by customer price revisions and higher output, while increased maintenance and repair costs weighed on operating margin.
- Prime Wafer Business:** Record 8-inch wafer output and strong silicon parts demand drove sales and profit growth, while a higher silicon parts mix improved operating margin.
- Semiconductor-related Equipment& Materials Business:** RSPDH output declined due to planned production cuts, while the energy business achieved revenue growth but remained loss-making due to growth investments.

Medium-Term Management Plan

02

Overview of the Medium-Term Management Plan (2026-2028)

- Positioning the next 3 years as a focused investment phase to accelerate growth, investing heavily in the wafer reclaimed business
- Expecting growth from 2027 onward, including M&As etc

(Million JPY)	FY2024(A)	FY2025(A)	FY2026(F)	FY2027(F)	FY2028(F)
Sales	59,200	76,707	84,000	105,000	115,000
Operating Income	13,108	14,281	15,400	17,500	19,000
<i>Operating Margin</i>	<i>22.1%</i>	<i>18.6%</i>	<i>18.3%</i>	<i>16.7%</i>	<i>16.5%</i>
Ordinary Income	15,668	16,635	17,200	19,000	20,000
Ordinary Margin	26.5%	26.4%	20.5%	18.1%	17.4%
Net Profit	9,446	9,297	10,000	11,500	13,000

ROIC	12.7%	10.8%	11%以上
ROE	15.2%	12.5%	13%以上

Analysis and evaluation (capital profitability and cost of capital)

- At present, we are in the investment phase and the return on capital is declining. However, we aim to improve ROIC by monetizing large-scale investments mainly in reclaimed wafers and improving capital efficiency.

*ROIC= NOPAT / invested capital (shareholders' equity + interest bearing debt average)

WACC	9.0 %
------	-------

*WACC= Cost of equity x Shareholder equity/(invested capital) + Cost of debt x interest-bearing debt/(invested capital) x (1- effective tax rate) ,using the average value for the past two years in our company

*ROE= Net Income Attributable to Parent / Equity Average

Cost of Equity	10.5 %
----------------	--------

*Cost of equity = 10.5% calculated based on risk-free rate + beta value x risk premium

*Capital used as the denominator for ROIC was changed from (shareholders' equity + interest-bearing debt) to (equity + interest-bearing debt). The denominator for ROE calculation was unified to the average of shareholders' equity at the beginning and end of the period in accordance with the Annual Securities Report.

Initiatives to Improve Return on Capital (Cash Allocation)

- Accelerate growth investment in our company's highly profitable reclaimed wafer business to maximize operating CF

Initiatives to Improve Return on Capital (Large investment in reclaimed wafers)

- Accelerate investment in the highly profitable wafer reclaimed business over the next 3 years to further increase market share and earnings
- Reopen Sanbongi Plant No. 7 and acquire Tainan Plant No. 2 to increase cumulative production capacity to approximately 1.2 million wafers per month by 2028

<Sanbongi Plant (Japan)>

- Construction of Plant 7 capable of producing 170K per month
- Plan to improve production efficiency through advanced equipment and automation at Plant 7

<Tainan Plant (Taiwan)>

- Acquisition of Plant 2 to meet increasing demand in Taiwan
- Construction of Plant 2 to produce 200K per month by 2028 and 300K per month by 2030

<China Plant (China)>

- Plan to achieve monthly production of 100K per month by 2028

Expansion Plan for Reclaimed Wafers

Capital Investment Plan: Wafer Reclaim Business

- Major investments to capture global semiconductor demand at 3 sites in Japan, Taiwan, and China by 2028
- Establish monthly production capacity of 1.19 million wafers to further expand market share

Capital Investment Plan: Prime Wafer Business

- Production capacity for 8 inch prime wafers will reach 300K per month in 2026
- Production capacity for 12 inch prime wafers will increase to 250K per month 2028

※1 The 12 inch business will be invested by an equity method affiliate

Initiatives to Improve Return on Capital (Shareholders Return)

The dividend per share for fiscal 2025 was ¥45, an increase of ¥10 from ¥35 in the previous fiscal year (payout ratio 12.8%). The dividend per share for fiscal 2026 is assumed to be ¥55

- In addition to the annual dividend increase, the dividend increase in 2025 will be 10 JPY, up from 5 JPY in the previous fiscal year.
- In 2026, we plan to increase the dividend by 10 JPY from the previous fiscal year and accelerate **the increase in the total return ratio**.
- Considering stock price trends, cash position, investment progress, and other factors, we will consider buybacks.

Initiatives to Improve Return on Capital (Investor Relations)

- We plan to increase the number of interviews with investors and promote IR activities that lead to increased corporate value.

◆ Directors' involvement in investor relations activities

- To deepen understanding of management policies and strategies
proactively set up opportunities for directors to engage in dialogue with investors

◆ Strengthening overseas investor relations

- Strengthened overseas investor relations in line with increased number of meetings with overseas investors (Non-deal roadshow in Europe in 2024)
- By simultaneous disclosure of financial results and timely disclosure information in English and enhancement of website in English, eliminate information asymmetry between Japanese investors and overseas investors

◆ Approach to individual investors

- Active participation in IR fairs, seminars, and other events to expand presence to individual investors

*1 Estimated by our company based on SEMI data

*2 State-owned enterprises subject to management and supervision by the central government

*3 As of the end of June 2026

- Since its establishment, RST has grown into the world's leading reclaimed wafer company.
In 2018, RST became a comprehensive wafer manufacturer by making a Chinese prime wafer manufacturer a consolidated subsidiary.

2010	Dec.	RS Technologies Co., Ltd. was established with the main business of reclaimed wafer.	Reclaimed
2014	Feb.	Established RSTEC Semiconductor Taiwan Co., Ltd. (consolidated subsidiary) in Taiwan	Reclaimed
2015	Mar.	Listed on Tokyo Stock Exchange “Mothers Market”	
2016	Sep.	RST transferred to “the First Section” of the Tokyo Stock Exchange	
2018	Jan.	Chinese prime wafer manufacturer, GRINM Semiconductor Material Co., Ltd. (GRITEK) became a consolidated subsidiary of RST	Prime
2018	May	Acquired 100% shares of Union Electronics Solution Co., Ltd.	Semi
2018	Aug.	Established Shandong GRIMN Semiconductor Materials Co., Ltd. (Shandong GRITEK), A consolidated subsidiary of GRITEK.	Prime
2019	Jan.	Acquired 100% shares of DG Technologies Co., Ltd.	Semi
2020	Feb.	Established Shanghai Union Semiconductor Co., Ltd. (Shanghai Union)	Semi
2022	Apr.	Transferred from the First Section of the Tokyo Stock Exchange to the “Prime Market” Establishment of Nomination and Compensation Committee	
2022	Nov.	GRITEK listed on Shanghai Stock Exchange (STAR market)	Prime
2023	Dec.	Established LE System Co.,Ltd, manufacturer of electrolyte for vanadium redox flow batteries (VRFB)	Energy
2024	Nov.	Established RS Technologies Group Xiamen Co., Ltd. in Xiamen, China, a consolidated subsidiary.	
2024	Dec.	Established RS Precision Devices (Huizhou) Co., Ltd. (RSPDH), manufacturer of optical pickup	Semi
2025	Jun.	Established RS Energy(Shandong) Co.,Ltd. a consolidated subsidiary	Energy
2025	Oct.	Established RS Energy Technology(Panzhihua) Co.,Ltd. a consolidated subsidiary	Energy

Reclaimed	Reclaimed Wafer Business
Prime	Prime Wafer Business
Semi	Semiconductor-related Equipment and Materials Business
Energy	Renewable energy related

- RST became comprehensive wafer manufacturers with the Reclaimed Wafer Business and Prime Wafer Business
- Expansion of business areas as Semiconductor-related equipment and materials Business
- No1 in global market share in reclaimed wafer business, and development of prime wafer business mainly in China

Consolidated net sales and operating income

Net sales by segment

What Reclaimed Wafer is

- Reclaimed wafers are wafers that have been reclaimed from test wafers used in the process of semiconductor manufacturing.
- Reclaimed wafers are used repeatedly by our customer. With our technology, RST can reclaim test wafers more than 10 times, helping to **reduce costs** for our customers, semiconductor manufacturers and **executing eco-friendly business model**.

■ Semiconductor Manufacturers

■ RS Technologies (RST)

Used in almost all processes

- **Monitor Wafer**
(application: process and processing accuracy evaluation)
- **Dummy Wafer**
(application: precision processing stability improvement)

RST **reclaims** the used test wafers for and returns to semiconductor manufacturers

Wafer Reclamation

Wafer reclamation is essential for manufacturing semiconductors

collecting used test wafers

Shipment

Reclaim customer's assets

Wafer Reclaim Business

- Achieve continued growth as a global supplier in the reclaimed wafer industry

Market Characteristics

Continued growth in the semiconductor industry

The global semiconductor market is expected to reach **USD 1 trillion** by 2029, growing at a CAGR of approximately 8% from 2025 to 2030*¹

*1 Source: "Semiconductor Market Forecast" by SEMI Japan

Resilient to economic fluctuations

- Used by various applications such as the start-up of semiconductor manufacturing equipment
- When customers become more cost-conscious during a recession, the amount of Reclaimed wafers' input increases
⇒ **Less susceptible to the silicon cycle**

The reclaimed wafer business is expected to grow more in the future

Results

Performance Trends (Reclaimed Wafer Business)

- Achieve significant growth by expanding production capacity and increasing the manufacturing sites

Shipping Regions

Securing a wide range of shipping destinations in Japan, Taiwan, Europe and North America

RS Technologies' market share in reclaimed wafer market

Global Market Share of Reclaimed Wafers

RST's Global Market Share in 12 inch Reclaimed Wafer Market

Global Market Share No.1 (about 31%)

Estimated in our company based on SEMI data

Shipments at the Sanbongi Plant and Taiwan Plant

Trends in the number of 12 inch wafers shipped at the Sanbongi Plant and Taiwan Plant

Wafer Reclaim Business (1)

Identify exact needs through direct sales system

Communicate directly with all customers
Make it possible to reduce SGA cost by handling only from Tokyo headquarters

Strip off all films

Due to chemical treatment, surface damage is minimized

Increase the number of
reclamation

More cost reduction possible

Scratches and dents

Smooth scratches and irregularities on the surface by polishing (polishing).

Inherited original
technology from
Lasa Industries

Remove metal impurities

Remove fine dust and dirt from wafer surface by cleaning

Removal of metal impurities

Especially, strong in decontamination
and removal of copper (Cu)

• Metal impurities
• Garbage (particles)

Demand for Reclaimed Wafers: **New** 12 inch semiconductor Plants

- In the global market, new 12 inch semiconductor plants are under construction in China, Europe, the United States and Japan.
- RST meets new demand for reclaimed wafers through capital investment in Japan, Taiwan and China.

Sales Structures

- The ratio of reclaimed wafers and sales wafers in the segment continued to be around 7:3.

Earnings Structure

Sales of Wafer Reclaimed Business

Reclaimed Wafers

(Processing unit price x number of shipments)

We receive used test wafers from semiconductor factories. We polish, clean and return them to the same factory.

Sales Wafers

(Unit selling price x number of units sold)

Spec-out test wafers are purchased from the market and polished by RST. RST sells as new test wafers to semiconductor factories in demand.

After sales wafers (new test wafers) are used, they are recycled at RST and used repeatedly as reclaimed wafers.

Breakdown of Sales

(Million JPY)

■ Reclaimed Wafers

■ Sales Wafers

Business Profile (3/5 Prime Wafer)

- A prime wafer is a silicon wafer that is a substrate material for semiconductors and used for semiconductor chips.
- Made from 99.999999999% silicon, it has the highest flatness of any material currently on Earth.

Expansion into the Prime Wafer business

- With a Chinese SOE* ¹ named GRINM, GRINM Semiconductor Material Co., Ltd (GRITEK) was established.

*(1) State-owned enterprises subject to management and supervision by the central government

Synergistic between RST and GRITEK

Strengths

GRITEK's technological capabilities

Benefit from China's semiconductor policy

RST's global sales network to sell to global customers

Utilizing RST reclaimed technology

With more than 30 years of knowledge and insight from RST

Clean Room

有研科技集团有限公司(Grinm)

Founded in 1952, China's largest state-owned research institute in the field of nonferrous metals
About 2,000 researchers are employed out of about 4,100 employees.

Business (4/5 Prime Wafer Business in RST)

- In 2018, the company entered the industry through a joint venture with China's largest state-owned research institute in the field of nonferrous metals, GRINM as a consolidated subsidiary, GRINM Semiconductor Material Co., Ltd.(GRITEK)
- Construction of a flagship plant for prime wafers in Shandong Province, China

Sales Structure

- Prime wafers and silicon components manufactured at our Dezhou and Beijing plants in China as its core products.

Sales Structure of Prime Wafer Business

(FY2025 Result)

Products

Prime Wafer

Supplies 5, 6, and 8inch prime wafers to EPI houses and semiconductor manufacturers in China

Silicon Components

Supplies silicon components processed into consumable parts for etching equipment etc to processing manufacturers in China and globally.
(End users include etching equipment manufacturers and semiconductor manufacturers.)

Ingot and others

Sales of wafer ingots, including FZ ingots, as well as technical consulting services and other related service

Image of 8-inch Prime Wafer Commercial Flow and Sales Structures

- Gritek continues to enjoy high profit margins due to its strength in a niche segment in the prime wafer market
- Demand for power semiconductors is on the rise thanks to subsidies for the purchase of home appliances, one of the Chinese government's efforts to revitalize the economy.

■Key Commercial Flow Images of Gritek 8-inch Wafers

■Application

Prime Wafer Growth Strategy (Forecast)

- Demand for 8 inches is expected to increase slowly through 2028
- Demand for 12 inches is expected to exceed 4 million units per month in 2030.

(Unit: ten thousand)

Forecast of monthly production volume by wafer size in China (based on RST)

【 Strategy to 2028 】

■ 8 inches

Development of new products for high-voltage power semiconductors, Gritek's strength

Strengthen investment to increase production
=> Aim for 20% market share in China by 2027 and beyond

■ 12 inch

Build mass production system to increase prime wafer shipments in China
=> Aim for 7% market share in China's 12 inch market

GRITEK

Business Trend

Achieving High Profitability Management by Specializing in Niche Fields

- Growth of the overall 8 inch market in China is slowing while Gritek's strength in 8 inch power semiconductor wafers remains strong
- With the rise of 12 inch wafers, unit prices are declining, especially for standard wafers for IGBT and memory applications.

Key Initiative

Maintain high profitability by upgrading production efficiency

- Strengthening competitiveness by actively investing in the development of new products
- Upgrading production efficiency and reviewing production management can help GRITEK maintain high operating margin even though unit price goes down

SGRS

Steadily acquire certification from customers and look ahead to mass production

- With the transfer of technology from Gritek, SGRS has expanded its certification of 12 inch wafers for power semiconductors.
- The volume zone of the market has made steady progress in obtaining certification for polished wafers.
- Chinese competitors are operating with huge losses due to excessive investment. SGRS is promoting R & D and capital investment while limiting losses.

Steadily increasing production capacity through investment plans based on market trends

- Gritek's technology has been transferred to power semiconductors. We will also seek certification for polished wafers in the volume zone.
- Strengthening capital investment and securing human resources in anticipation of mass production shipments

Business scheme to invest in the prime wafer business

- GRITEK is listed on the Shanghai Stock Exchange, STAR Market (SHA: 688432).
- The below risk-controlled model involving a Chinese sovereign wealth funds

※1 Dezhou Huida Semiconductor Equity Investment Fund Partnership

As of End of June 2026

Business (5/5 Semiconductor-related equipment and materials Business)

- Manufacture of silicon and quartz consumables for semiconductor manufacturing equipment and sales of scanning acoustic tomograph (SAT), laser diode and electronic components

Energy Business

- In December 2023, we entered the energy business through M & A. In June 2025, we established RS Energy Co., Ltd., which operates the VRFB electrolyte business in China.

[Energy Business Core Mission]

- Become a total energy solutions company leveraging the collective capabilities of the RS Technologies Group
- Contribute to the realization of a sustainable environmental society through the stable supply of VRFB electrolytes with superior safety and longevity

Company Name	LE System Co., Ltd./ RS Energy Co., Ltd
Establishment	October 13 (Date of acceptance: December 2023/June 2025)
Business	Electrolyte production of vanadium redox flow battery Electricity rate optimization consulting, etc.
Address	NT Building, 1-47-1 Ohi, Shinagawa-ku, Tokyo, Japan (The same office with RS Technologies, Inc.)
Manufacturing Base	Fukushima(Japan)、 Panzhuhua(Sichuan Province, China)※Under Construction
President and CEO	Issei Osawa

- From December 2023, the former LE System business was completely succeeded.
- The key technology of the former LE System is technology originated in Japan, and it has received a lot of support including investment by INCJ, Ltd. (Public and Private Sector Fund in Japan).

< Scheme >

Medium- to Long-term Outlook (Energy Business)

- After 2026 years of business development, we plan to become a total energy solutions company in the medium- to long-term. Promoting medium- to long-term outlook to develop into a business that plays a central role in the Group

Business Domain		Phase 1 2023~	Phase 2 2026 ~	Phase 3 2029 ~
Electrolyte for VRFB	Electrolyte for VRFB	【 Establishment of core business 】 Manufacture and sale of electrolyte for VRFB In-house manufacturing (Namie, Panzhihua, and others)		
VRFB General	VRFB system	[Business Expansion] Sales of Electrolyte and Storage Products ・Wholesale of VRFB systems (cells) ・Wholesale of electrical storage products ・Manufacture and sale of electrolyte materials		
Energy related	Energy trading company			
	Power Storage Development			
Energy Solutions	Aggregators	[Long-term Strategy] Integrated Storage Solutions Storage Plant Operation		
	Storage Battery Solutions			

What is Vanadium Redox Flow Battery (VRFB)?

- VRFB is a battery that charges and discharges by circulating and chemically reacting vanadium electrolyte.
- LE system manufactures vanadium electrolyte for VRFB

Primary Use

Use as large-scale, large-capacity stationary storage batteries for wind and solar power generation

Mechanism

VRFB realizes charge and discharge by chemical change (redox) of electrolytic solution, while other batteries charge and discharge by chemical change of electrode.

Features

Since the number of charge and discharge is unlimited and there is no deterioration, it is possible to conduct stable operation over a long period. Moreover, it has high safety and it is well-matched with renewable energy.

VRFB is a high-capacity stationary storage battery with high safety and stable supply suitable for wind and solar power generation, etc.

Energy Business (Domestic Market Trends)

- Aiming to achieve GX2040 Vision set by the Ministry of Economy, Trade and Industry on February 18, 2025, LE System will continue initiatives for social implementation of VRFB

What is the GX2040 Vision?

The GX2040 Vision is a strategic vision for Japan to achieve a decarbonized society and sustainable economic growth by 2040.

Seventh Basic Energy Plan is “To achieve a 73% reduction in greenhouse gas emissions by fiscal 2040 (compared to fiscal 2013 levels), position renewable energy as the “largest power source” for the first time, with a target of about 40 ~ 50%”

[Energy Composition in Japan]

Renewable energy is expected to **increase by approximately 320 billion kwh from 2023**

= **Demand for storage batteries will grow for stable supply**

[Basic Principle of Energy Policy: “S+ 3E”]

[Efforts of LE Systems to Deploy VRFBs that Meet S+ 3E]

One of the Key Issues in Achieving the 2040 Vision

「Stable Supply of Renewable Energy」

We anticipate opportunities for VRFBs to contribute to large storage systems

Energy Business (China Market Trends/Business Progress)

- Established RS Energy (Shandong) Co., Ltd. an energy-related subsidiary of subsidiary in China, in June 2025
- The Panzhihua Plant established with a partner company as a joint venture is under construction in China

Feb.2026

May.2026

Jun.2026

Panzhihua Plant – Expected Completion

Planned VRFB Electrolyte Production Capacity
 By the end of 2027: 30,000m³/year
 By the end of 2028: 60,000m³/year

China Market Trends

2025 China VRFB Project Information

■ Scale of new VRFB installations

4,179_{MWh}

■ Year-over-year capacity

+140%

Source: Compiled by RST based on various sources

- Succeeded optical pickup module and in-vehicle camera module manufacturing and sales business through M & A in December 2024

Company name	RS Precision Devices (Huizhou) Co., Ltd. (RSPDH)
Established	November 20, 1995 (Date of business succession: December 2024)
Capital	555 million yuan
Business Profile	Optical Pickup Module Manufacture and sale of in-vehicle camera module
Address	Zhonggao New District, Huizhou, Guangdong Province, China

Regional strategies

Japan, North America and Europe

Sanbongi Factory (Japan's flagship factory) covers mainly North America, Europe and Japan

Wafer Reclaimed Business:
Tariff Impact Due to Change of
Government in the United States

Strategy to avoid the impact of U.S.-China trade friction

C h i n a

Prime wafers at present
is sold mainly in China

T a i w a n

Taiwan plant covers
Semiconductor foundry companies
based in in Taiwan

Board of Directors

- In March 2022, we changed our organizational structure to a company with an audit and supervisory committee to strengthen our governance structure

Directors

Nagayoshi Ho
CEO

1998: founded Eiki Shoji Co., Ltd
2010: RS Technologies's CEO(current)
CEO of DG Technologies,
Chairperson of subsidiaries in Taiwan
and China

Satoru Endo
Director
CEO (Manufacturing/ Engineering)

1991: Rasa Industries
2011: RS Technologies (RST)
2017: RST's director (current)
DG Technologies' director
Chairperson of subsidiaries in Taiwan and China

Issei Osawa
Director

2006: Eiki Shoji
2012: RS Technologies (RST)
2023: RST's director(current)
CEO of LE System

Kiyohide Tomatsu
Director/Senior Executive Officer/CSO/CAO

2020: Kiraboshi Bank
2023: RS Technologies (RST)
2024: RST's director(current)
Chairperson of RSPDH

Independent Outside Director

Takayoshi Nakano

Director
2015: Director and Executive Director
of UACJ Corporation
2026: RST's director(current)

Hiroyuki Kanamori

Director, Audit and Supervisory Committee Member
1988: Asahi Shinwa (currently KPMG Azsa)
2022: RST's director (current)
President of Kanamori Certified Public Accountants Office
Representative of Minato Certified Public Accountants Joint
Office
Outside Director of a listed company

Cuiping Zhang

Director, Audit and Supervisory Committee
Member
2004: attorney registration in China
2011: Registered Foreign Lawyer (Chinese Law)
Nishimura & Asahi Partner of Foreign Law Joint
Enterprise
2022: RST's director(current)

Taro Izawa

Director, Audit and Supervisory
Committee Member
1981: TOPPAN
2024: RST's director(current)

Strengths of Nagayoshi Ho

- President and CEO, Nagayoshi Ho has used the knowledge accumulated in Japan for more than 20 years. His strength includes **ability to sell, network, partner and fund globally**
- He has assembled a team of professionals from a broad range of fields, including advanced technology and finance.

Nagayoshi Ho

- Born in 1970 in Fujian Province, China
- Josai International University : Ph.D in Business Administration
- 1998: He established Eiki Shoji Co.,Ltd
- 2010: He established RS Technologies Co.,Ltd
- Naturalized in Japan in 2014

■ Specialty

M & A, Business Alliance

■ Favorite Maxim

Where there is a will, there is a way

■ Note

- He came to Japan after graduating from high school. He has invested in various industries such as fund, trade, hotel, IT, and agriculture in addition to semiconductor business.
- Based on his belief that "Japan's manufacturing is the best in the world," he has been traveling around the world to spread his belief.

Appendix

04

Sanbongi Plant (RS Technologies, Reclaimed Wafer Business)

- Jan. 2011: Started operations of Sanbongi Factory Plant
- With the acceleration of growth in semiconductor market, Plant 7 will re-start operations to meet the growing demand.
- Mass production at Plant 7 is scheduled to begin in FY2026

Company name	RS Technologies, Co.,Ltd.
Establishment	December 2010
Product	5, 6, 8, 12 inch Reclaimed Wafer
Production capacity	8 inch : 150,000 wafers per month 12 inch : 340,000 wafers per month Plant 7 Capital Investment Plan 2026: 40,000 wafers per month 2027: 120,000 wafers per month 2028: 300,000 wafers per month
Address	Osaki City, Miyagi Prefecture, Japan
Certification	ISO9001, ISO14001

Tainan Plant (RSTW, Reclaimed Wafer Business)

- Dec. 2015: Production commenced at RSTEC Semiconductor Taiwan Co., Ltd. (RSTW).
- From 2027, Plant 2 will start operation

Company name	RSTEC Semiconductor Taiwan Co., Ltd
Establishment	December 2015
Product	12 inch Reclaimed Wafer
Production capacity	12 inch: 270,000 wafers per month New Plant Capacity (Plant 2) 2027: 50,000 wafers per month 2028: 200,000 wafers per month 2029: 250,000 wafers per month 2030: 300,000 wafers per month
Address	Tainan, Taiwan
Certification	ISO9001, ISO14001

Dezhou Plant (Shandong GRITEK, 8-inch Prime Wafer Business)

- Aug. 2018: Shandong GRITEK Co.,Ltd(Shandong GRITEK, a consolidated subsidiary of GRITEK) was established.
- Oct. 2020: The Dezhou plant started prime wafer production.

Company name	Shandong GRITEK Co., Ltd.
Establishment	October 2020
Product	5,6,8 inch Prime Wafer
Production capacity	5 inch: 50,000 wafers per month 6 inch: 200,000 wafers per month 8 inch: 250,000 wafers per month
Address	Dezhou city, Shandong, China
Certification	ISO9001, ISO14001

SGRS Research and Development Center (SGRS, 12 inch Prime Wafer Business)

- Mar. 2020, GRINM RS Semiconductor Materials Co., Ltd. (SGRS) was established.
- In 2021, R&D line for 12 inch prime wafer (10,000 wafers per month) was established.

Company name	GRINM RS Semiconductor Materials Co., Ltd.
Establishment	March 2020
Products	① 12 inch Prime Wafer ② 12 inch Reclaimed Wafer
Production capacity	① 100,000 wafers per month 10,000 wafers per month (R&D line) ② 50,000 wafers per month
Address	-Dezhou, Shandong, China -Beijing, China

Kamisu Plant and Kurihara Plant (DG Technologies)

- In January 2019, DG Technologies became a consolidated subsidiary of RS Technologies.
- To meet growing demand, DG Technologies increases production through capital investment and the improvement of productivity.

Company Name	DG Technologies Co., Ltd.
Commencement of operation	May 2021
Product	For dry etching equipment Consumable member made of quartz and silicon
Address	Kurihara City, Miyagi Prefecture
Certification	ISO9001, ISO14001

Company Name	DG Technologies Co., Ltd.
Establishment	October 1981
Product	For dry etching equipment Consumable member made of quartz and silicon
Address	Kamisu City, Ibaraki Prefecture
Certification	ISO9001, ISO14001

Namie Plant (LE System)

- In December 2023, RST completely succeeded the electrolyte manufacturing business ^{*1} of the former LE System.

^{*(1)} The key technology of the former LE System is technology that originated in Japan, and has received a lot of support including investment by INCJ Co., Ltd. (Public and Private Sector Fund in Japan).

Namie Plant in Namie, Fukushima, Japan (Constructed in 2021)

Office in Tsukuba City, Ibaraki Prefecture
(Constructed in 2013. Technical research/pilot plant)

Company name	LE System Co., Ltd.
Establishment	October 13, 2023 (Business Succession Date: December 2023)
Business Profile	Electrolyte for vanadium redox flow batteries
Production capacity	5,000m3 per year
Location	Namie-machi, Fukushima Prefecture (Plant) Tsukuba City, Ibaraki Prefecture (office)
